WCPES-Series High Purity WaterClear™ Polyethersulfone Filter Cartridges are a value-oriented, reduced surface area choice for cost-effective, general purpose membrane filtration. Designed in continuous lengths up to 30” for excellent performance value. The highly retentive polyethersulfone membrane offers excellent flux density and low protein-binding. The naturally hydrophilic membrane wets easily to allow for the maximum utilization of the surface area. These features allow the WCPES-Series to provide the fine performance of PES membrane at a competitive price.

Designed to tolerate repeated hot water sanitization and in-situ steam sterilization cycles. Manufactured in a clean-room environment to maintain high standards of purity and cleanliness.

**Construction Materials**
- **Membrane**: Polyethersulfone
- **Support Media**: Polypropylene
- **End Caps**: Polypropylene
- **Center Core**: Polypropylene
- **Outer Support Cage**: Polypropylene
- **O-Rings/Gaskets**: Buna, EPDM, Silicone, Teflon® Encapsulated Viton®, Viton®, Teflon® Encapsulated Silicone

**Dimensions**
- **Length**: 10 to 30 inches (25.4 to 101.6 cm) nominal
- **Outside Diameter**: 2.70 inches (7.0 cm) nominal

**Operating Conditions**
- **Change Out ΔP (recommended)**: 35 PSID
- **Temperature (max)**: 176°F (80°C)
- **Differential Pressure (max)**: 50 PSID (3.4 bar) at 68°F (20°C)

**Sanitization/Sterilization**
- **Filtered Hot Water**: 80°C for 30 min.
- **Steam Sterilization**: 121°C for 30 min., multiple cycles

**Chemicals**: Cartridges are compatible with most chemical sanitizing agents.

**Note**: Stainless steel insert option required for all cartridges being hot water sanitized or steam sterilized.

**Typical Applications**
- Deionized Water Systems
- General-Use Water Filtration
- Liquid Clarification
- Chemical Filtration

**DISCLAIMER**: Filtration data presented is representative of performance observed in controlled laboratory testing. It is not given as a warranty, specification or statement of fitness for use. Specific performance can vary widely depending on contaminant type, fluid properties, flow rates and environmental conditions. It is recommended that users conduct thorough qualification testing to assure the product functions as required. For additional technical support, a product Performance Guide is available upon request.

**Flow Rate vs Pressure Drop**

**Typical Applications**
- Deionized Water Systems
- General-Use Water Filtration
- Liquid Clarification
- Chemical Filtration

**FDA Listed Materials**
Materials of construction comply with FDA regulations for food and beverage contact use as detailed in the US Code of Federal Regulations, 21CFR. Materials used to produce filter media and hardware are deemed safe for use in contact with foodstuffs in accordance with EU Directives 2002/72/EC, 1935/2004, and/or 10/2011.
